SUMMARY

Computer Science and Engineering diploma student with practical experience in building web applications using the MERN stack and AI integration. Always eager to learn new technologies, improve my skills, and gain hands-on experience as a full-stack developer.

EDUCATION

Government Polytechnic, Mumbai **September 2024-present**
Diploma in Computer Engineering | *Current* Percentage: 92.00**%** *Mumbai, Maharashtra*

St. Xavier's School **March 2024**
SSC Board | *Percentage: 92.00 %* *Mahad, Raigad*

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, HTML5, CSS3
Frontend: React.js, Next.js, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, JWT, Firebase Authentication
Databases: MongoDB, Mongoose, PostgreSQL
Tools: Git, GitHub, Postman, OpenAI Codex, Claude AI, Vercel, Render

EXPERIENCE

MERN Stack Intern | InternBoot **July 2026-August 2026**

- Gained hands-on experience with the MERN stack (MongoDB, Express.js, React.js, and Node.js) during a 45-day internship.
- Built a Mini Employee Management System using React.js, Node.js, Express.js and MongoDB, with REST APIs for CRUD operations on employee records.

PROJECTS

Chat application | Node, React, Express, Firebase, ImageKit **September 2026**

- Developed a real-time chat application using React, Firebase, and ImageKit, integrating Firebase Authentication and Firestore for user management and real-time message synchronization.
- Implemented media upload and sharing, profile management, and responsive UI components, with Firebase security rules to control authenticated access to user and chat data.

Crafton Bags | Node, React, MongoDB, Express, Firebase, SEO Optimization **May 2026-present**

- Developed a commercial e-commerce platform for Crafton Bags as a sponsored project, using the MERN stack to build a scalable and responsive online shopping experience.
- Implemented reusable React components, category-based product rendering, product detail views, cart state management, and Google authentication, with backend API integration for efficient data handling and seamless navigation.

Gesture-Controlled Hill Climb | Python, OpenCV, MediaPipe, ML Algorithms **May 2026**

- Developed a touch-free Hill Climb Racing controller using Python, OpenCV, and MediaPipe, integrating hand landmark detection with a trained Logistic Regression model for real-time gesture classification.
- Extracted 21 hand landmarks as input features, trained and evaluated the model, and mapped predicted gestures to game actions using automated keyboard controls with PyDirectInput.

ACHIEVEMENTS/CERTIFICATIONS

- 1st Rank – Tech Quiz Event, Government Polytechnic Thane.
- 2nd Place – Technical Competition, Vivekananda Education Society.
- 2nd Place– Tech coding Competition, Fr. Agnel Polytechnic.

EXTRACURRICULAR

Participation in Technical Events: Actively participated in technical events, coding competitions, and problem-solving activities to enhance analytical thinking, teamwork, and technical skills.
